

Meybike®

The kick stand on MeyBike® is a specially constructed extra wide and strong double kick stand. When positioned on the kick stand the tandem stands stable enough for one to help the child up and if necessary strap the child on to the front saddle.

Brings new experiences closer...

Meybike® is a tandem for parents with a disabled child. The tandem creates new possibilities for outdoor activities, it is good exercise for both parent and child and requires team-work to succeed. The tandem gives a newly found freedom in the many possibilities for exciting experiences and new impressions that a bicycle ride can give.

The tandem is unique because it has dual steering, meaning both handle bars steer the front wheel of the bicycle. It is however possible to move the front handle bar to an integrated fitting that blocks the front steering, the bicycle is then steered solely from the "adult position". The fact that the child can sit in front and enjoy the view and the feeling of the wind on the face makes riding the tandem even more enjoyable for both parent and child.

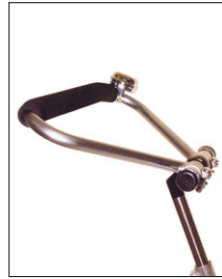

A unique feature of MeyBike® is that it is possible to add a freewheeling front crank axle, which makes it possible to disconnect the front pedals in case the child becomes tired.

Accessories

Cradled handlebar
 Back brace with strap
 PVC back shield with strap
 Foot plates with straps
 Foot plates with straps and calf support
 Counterweights for foot plates
 Fitting for reducing the pedal arm length
 Freewheeling front crank axle

Foot plates w. straps and calf support

Cradled handlebar

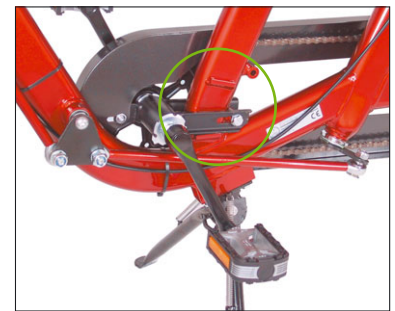

Back brace with strap

PVC back shield with strap

Meybike® is available in the two colours metallic red and metallic blue. The front part of the frame fits children from around the age of 3 (approx. 80 cm tall) to small adults (approx. 165 cm tall) just by changing the seat pin. This is due to the fact that Meybike® has a unique bracket that makes it possible to raise the front crank so the required "leg length" is shortened.

Facts about Meybike®

Complete length	240 cm
Width (handlebar)	66 cm
Wheel size	24 x 1,75"
Saddle height rear	75 - 100 cm
Entering height (front / rear)	35 cm / 45 cm
