

Meywalk® 2000

MEYWALK® 2000 comes complete with seat, trunk support, rear stop, handlebar, fender wheels and parking brakes.

The built-in raising/lowering system makes it easier for the user to get in and out of the walking support. Simply release the locking buttons at the front and swing up the swing bar. This lowers the seat unit 15 cm (6") on size Medium and 25 cm (10") on size Large. When the user is in position, the seat unit is raised again by pressing the swing bar down until it locks with an audible click.

The springy walker...

MEYWALK® 2000 from Meyland-Smith in Denmark is the improved version of the famous MEYWALK® walking support. The height of the trunk support and seat can now be adjusted quickly and stepless with spanner grips. MEYWALK® 2000 Medium is for children from 7 to 14 years of age, and MEYWALK® 2000 Large is for young people from 14 years of age and adults. The seat and trunk support has spring suspension to encourage a better and more natural gait. The seat unit can be lowered by using a swing bar, making it easier for the user to get in and out of the walking support and putting less strain on the carers. The body posture of the user can be set in any position from vertical to bent forwards by 15°, making it possible to find the body inclination that gives the user the best control.

MEYWALK® 2000 is made with materials of high quality, that guarantee long life, maximum reliability and a minimum of maintenance. MEYWALK® 2000 is therefore suitable for indoor as well as outdoor use.
